

Sirs:

This petition is neither a complete-work, nor a consensus of the Amateur Radio Licensees. Apparently the bureaucracy at the ARRL feels they need to make a solo splash and decided to do it in a rushed manner.

Their proposal makes little sense in a studied technical review of existing operating environment. It seems to be solutions in search of problems, or ideas spawned from too many Saturday night beers.

In light of what is transpiring among many AM and 'HiFiSSB' miscreants a knee jerk reaction is understandable, however the ARRL proposal is not a serious, comprehensive, best solution.

I respectfully request that this proposal be denied, with instruction to the ARRL to rework the document, with suitable input from the ARRL Membership.

Thank you,
Emil Borys
